

INCH COIN WHITEPAPER

Supporting our initiative of spreading
financial literacy and cryptocurrency
education across the Globe
November 8 2021

Disclaimer

<https://www.inchcoin.org/>

The purpose of this white paper is for information only and to present INCH Token to holders, cryptocurrency exchanges, and other interested parties. The information provided may not be exhaustive and does not in any way imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information.

Introduction

The INCH token (INCH) is a social media-driven decentralized cryptocurrency with a fixed supply of 100 Million tokens that was initially launched on August 1 2021 at \$0.0001 and reached a peak of \$736,511.72 market cap with an all time high price of 0.007365117206. It is currently listed at 0.00066736 on dextools [with a market cap of \\$66,735](#). The token was launched by Canadian co-founders [Greg Hung](#) and Terry Masson on the Ethereum blockchain from Vancouver, Canada. We have plans to migrate the inch tokens to the Binance Smart Chain (BSC) to offer a cheaper and faster purchasing experience for future token holders. The INCH token was co-launched in Canada at the same time as the NOMAD token, with different tokenomics as an educational experiment to see what token holders would value more. Both tokens have their roots in cryptocurrency education and knowledge sharing.

Full Transparency & No Rug Pull Guarantee

A unique element of the INCH token is a fully transparent education and community driven cryptocurrency project. The co-founders live streamed in person almost every aspect of the token's journey from launch, liquidity pool creation, token lock up, and token migration to the binance smart chain. As a commitment to our holders in Sep 2021 [both co-founders locked their 10% share of their INCH coins](#) in a trusted secure 3rd party until Jan 1 2022.

Vision

Our goal is to onboard millions and millions and millions of people to safely and securely enter the crypto space with the education, guidance and leadership of the most honest and transparent crypto team in the entire world.

The INCH Education Token was the Vision of Terry Masson. Canadian Crypto Investor from Kelowna, Canada.

We are the most honest and transparent team in the digital asset space with a strong community backing. Our mission is to take you inch by inch and step by step into the wonderful world of crypto until you are comfortable enough to navigate the blockchains and educated enough to make informed decisions on your own.

We teach newcomers all the ins and outs of how crypto works. They gain experience and confidence using NOMAD and INCH Tokens as their first safe crypto purchases. With our "No Rug Pull Guarantee" they can learn the process safely and continue on their education being lifetime holders.

Through our education channels we can safely navigate you through this new industry helping you to achieve generational wealth from crypto.

This vision is achieved through the project's strengths:

- Both Co-founders have a combined 16 years experience as Educators online and Offline. [Terry Masson](#) was previously a National Director & Instructor for a Canadian National Massage Business for 9 years . Greg Hung transitioned from a 13 year career in IT to Online Instruction in Content Creation and Cryptocurrency for the past 7 years.
- The co-founders are fully transparent and have shared their journey from launching the token publicly to locking up the tokens
- Co-founders are both Canadian and public figures that do not hide behind logos or animal icons.
- The project has an ambitious roadmap to migrate tokens to energy efficient blockchains like Binance Smart chain, Cardano ADA, and Polygon Matic.

- Full transparency in our projects to help build trusts and confidence to grow this project for the long term

The INCH token is one of the first set of tokens created in Canada by Canadians and is at the forefront of crypto's third wave (the first being Bitcoin, the second being Ethereum/Dogecoin proof-of-work). INCH is fully adapted to the future of the DeFi ecosystem leveraging next-gen Proof-of-Stake (PoS) technology across multiple blockchains.

Versatile & Adaptable – INCH Token is blockchain agnostic. While initially launched on Ethereum (as an ERC-20 token) we have filed applications to migrate to the Binance Smart Chain to alleviate fees purchasing on the ethereum blockchain. We have plans to migrate our tokens to Polygon, Cardano and Solana blockchains. This versatility is a key quality of INCH token allowing it to not only be accessible through more exchanges & markets & benefit from the strengths of each particular blockchain.

An Innovative Canadian Project - The NOMAD & INCH Ethereum based tokens being launched in Canada are a win for the country alongside other milestones in the Cryptocurrency world such as the first Bitcoin ATM in Vancouver Canada, and the first Bitcoin and Ethereum Exchange Traded Funds (ETF's). Our tokens are on the cutting edge being bridged to multiple chains and being integrated into Non Fungible Tokens (NFT). We hope to trailblaze the way for other Canadians to get involved in cryptocurrency through the education & knowledge we share.

Transparent – Unlike other cryptocurrencies that are shrouded in anonymity and lack of transparency, NOMAD token has 2 visible co-founders Greg Hung & Terry Masson from Canada.

Community Driven – Community is the very essence of INCH Token: an ecosystem of digital nomads, remote workers, digital artists, marketers, entrepreneurs, and enthusiasts looking to collaborate and socialize. We have already engaged the online community to help with our website, graphic design, and provide input for key decisions in the project. The core of the community is here for the long term.

NFT-Ready – NFT's have gained mass popularity in 2021 and nomad token co-founder Greg Hung has experience minting NFT's. He is working with a Dutch Digital Nomad Illustrator in Mexico to build an NOMAD NFT collection on platforms like Opensea. There are already plans in November 2021 to hold workshops to teach Digital Nomads to mint their own NFT's. The event will be NOMAD token access only providing an example of the use case of the tokens for education purposes and skillshare. After our NOMAD NFT project we may look at leveraging our expertise in NFT's to launch an INCH token NFT project.

The Value of Social Tokens

Social Tokens Will Disrupt Industries

Social is powerful and our tokens got inspiration from another social token called Million on Youtube. It is the only element that can drive exponential growth, seen in the rapid rise of social-media networks.

It is important to consider the INCH Token within the context of the current crypto market place. The CEO of RealVision and former Goldman Sachs executive Raoul Pal went on [TheDefiant podcast in July 2021](#) discussing this emerging sector in cryptocurrency

"I took some macro bets on the future of where this is all going including communities and social tokens," Pal commented.

According to Pal, in the near future, businesses will soon be centering their efforts around communities. They will be driving their own value systems through social tokens, and benefitting from the network effects of those systems.

Pal also pointed out that the social tokens industry will move from a billion dollar business to a trillion dollar business over the next five or ten years. INCH Token is perfectly positioned to take advantage of this new movement.

INCH ROADMAP

Phase 1

- ✓ Setup website, graphics, and social media channels
- ✗ BSC Network Integration
- ✗ Exchange Listings Coinranking.com
- ✓ Founder Token lockup at team.finance
- ✓ Collaborate with Off & Online Influencers to provide exposure

Phase 2

- ✗ Cryptocurrency Online Course for Beginners to Advanced
- ✗ Provide Education on Buying Tokens for Beginners
- ✗ Migrate Tokens to Cardano ADA
- ✗ Launch On Polygon
- ✗ Exchange listings on Coingecko.com & Coinmarketcap.com
- ✗ Exchange listing on Crypto.com
- ✗ Exchange listing on Wealhsimple
- ✗ Exchange listing on Coinbase
- ✗ Accept payment in INCH token

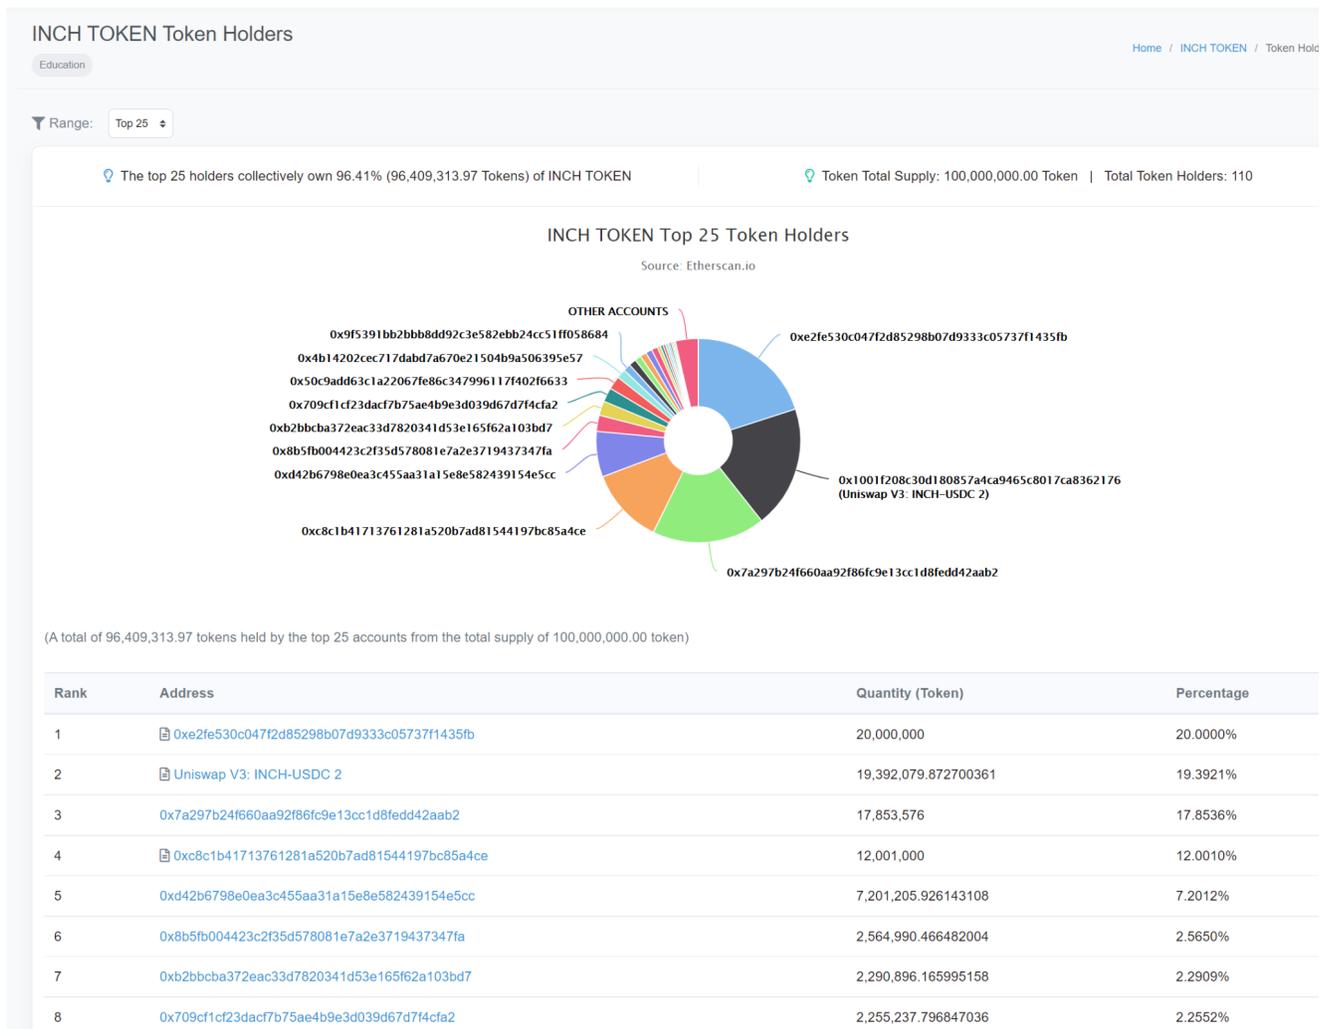

Phase 3

- ✕ Partnership with Celebrity Influencers
- ✕ Collaboration with Fortune 500 Brands
- ✕ 1 Billion Market Cap

Tokenomics

INCH has a fixed supply of 100 Million tokens and the tokenomics have 4 zeros after the decimal currently at .00066736. There are 114 holders for INCH across Ethereum. There are no large whales as the co-founders combined own 20% locked up.

Taken from etherscan on Nov 8 2021

Token Details

Token Name	Inch Token
Token Symbol	INCH
Total Supply	100,000,000
Token Type	ERC20 Token
Token Main Blockchain	Ethereum
Decimals	9
Smart Contract Address	0x78f2467318ac8009cb0abc82c34d0265314e9661

<https://etherscan.io/address/0x6339bd92eaa3cb8e629b06449e08b90581a33cea>

Token Distribution

The token was distributed on the Ethereum blockchain using Uniswap Liquidity Pools.

Founders

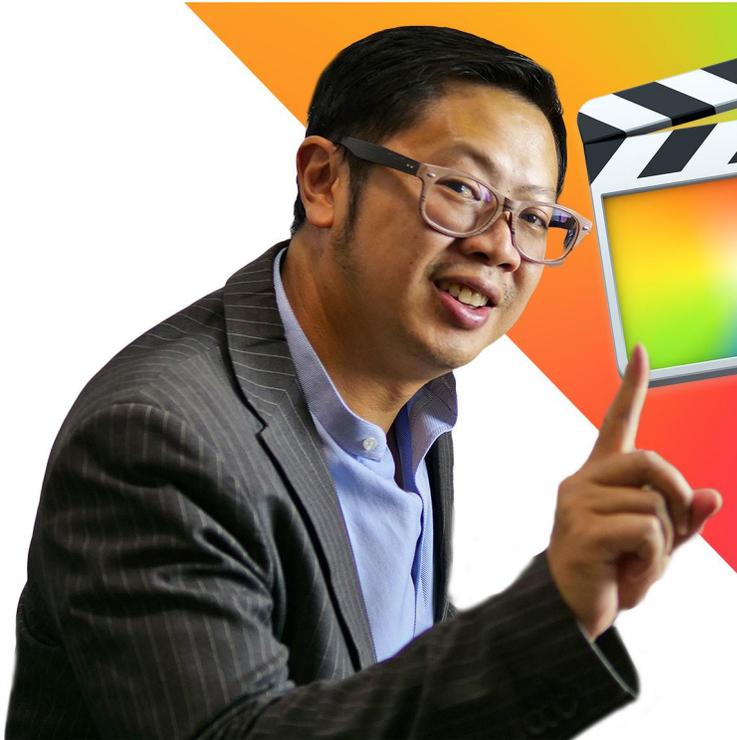

Terry Masson

Terry is a habitual entrepreneur and avid investor. He got his start at the age of 21 running his own investment club which made him enough money to buy a used Honda Civic. He went on to create and grow several businesses from wholesaling razor blades, to having an eBay store, to currently running a nation wide massage training school and clinic.

Terry's passion is helping people, whether it be freeing them of their pains through massage or improving their personal finances. He is a born leader and educator with the dedication to onboarding millions of people safely into the cryptosphere, so they can create generational wealth for their families, just like Terry has.

Project Contact Email: Inchcrypto@gmail.com

[Greg Hung](#)

Greg Hung is a Canadian Cryptocurrency Entrepreneur and Content Creator from Vancouver, Canada. Greg has a BA in Communications and an MBA from Simon Fraser University (SFU). He started his IT career with the Canada Revenue Agency and had a successful IT career in the private sector for over a decade in Vancouver.

He lived the Digital Nomad lifestyle for over a decade in Asia, mostly in Taiwan, Thailand, and Malaysia. Greg Bought his first bitcoin in 2017 in Chiang Mai and got back into Crypto in 2020. He tapped into his technical skills in 2021 to help create the NOMAD and INCH Erc20 tokens.
